

SYNOPSIS

ELLIPSES is a universal musical that stars the Galaxy family and their dog Gravity as they sing and dance their way out of a family tragedy, known as the Big Bang.

Before the world we have come to know, there once lived Singularity and their children. Their universe turns upside down when the firstborn HD1 strikes their parent and runs away with the dog to explore The Edge of the Universe (aka the Big Bang). To restore order, the other kids organize a search party to locate their oldest sibling. They encounter beasts, fight famine, and settle sibling rivalries on this cosmic journey. In the chaos, their baby sibling Milky Way gets separated. Alone, they must confront the Universe's most powerful foe: puberty.

Family is everything and so is the Universe. Our Universe is a family drama in play and this coming-of-age story answers the 13.8-billion-year-old question: What is family and how it is everything?
