

SYNOPSIS

ELLIPSES is an epic science mythology about family, child development, and adulthood. ELLIPSES stars Singularity and their teenage Galaxies and follows their quest to undo the Big Bang, after Gravity (the family dog) sets it off.

Every character is named after a celestial object. Singularity is the single parent who locked their kids in the house. Milky Way is the baby sibling who is going through galactic puberty. SPT0615-JD is the rebellious young adult who wants to leave home to go explore the Universe. JD is sick and tired of being stuck in the house with their family.

In a violent altercation, JD shoots Singularity to run away from home with Gravity (aka the Big Bang). Without their parent, the younger siblings are left to fend for themselves in the vastness of the cosmos. These Galaxies spend the rest of time looking for their missing oldest sibling. The supermassive heart of this coming-of-age story is self-discovery in isolation...
